neither to amount to anything. Sales were made at fluctuations of two or three points. There was nothing to attract outsiders.

From the lowest point, 85%c, there was a spurt to 85%c, some trading being done in the meantime. This little diversion soon ceased, however, and the market lapsed into a condition of quietude seldom experienced on the floor of the Exchange. For about two hours in the afternoon not a single trade was effected. Toward the close there was more animation, but prices did not improve. The final figures were 85%c, %c above the close of Tuesday, but with a weak feeling and a large element of uncertainty as to the future.

No one seems competent to give an explanation of the condition of the market. Each operator has his theory, and no two of them agree. Some think the producers' millions are at the bottom of the trouble. Some lay it to the secret workings of the Standard. Others hold that somebody is doing some heavy dumping, but where or how they don't know. It is a time for guessing, and the best guessers will be those who will safely ride the refluent wave.

The opening was 85%c: highest, 85%c: lowest, 85%c: closed, 85%c. Tuesday's clearings, 2-814,000.

A. B. McGrew quotes puts 84% to 84%, calls 88%4.

MARKETS BY WIRE.

Whent Demoralized by Unfounded Rumo and Heavy Feeling-Corn and Oats Stendy-Pork and Lard Unsettled and Prices Irregular.

CHICAGO, January 16.—Wheat was again fairly active and prices ruled both higher and lower than yesterday's closing. The market started out very firm and about 1c higher than yester-CATTLE A SHADE LOWER IN PRICE. day's closing, being a continuation of the firm-ness developed yesterday and the result of good buying, possibly the greater part for covering of shorts. Domestic markets all sympathized with the advance, and all opened higher. But Supply of Bulls Beyond Demand---Sheep the advance, and an opened higher. But the advance brought out considerable wheat, and it was reported that parties who did the buying yesterday were prominent in the selling to-day. The offerings were sufficient to create weakness, and changed the tendency of prices downward. Prices settled back with numerous fluctuations 1½. This decline was partly as-sisted by rumors that the Cincinnati Price Current would publish an article confirming Later the market became stronger on the re-ceipt of a dispatch from the editor of the Price Current, in which he stated the exportable supplies of wheat for the next six months would be about 20,000,000 bushels, of which 18,000,000 bushels was on the Pacific slope. Prices recov-

ered ½, and the closing was steadier and about ½ lower than yesterday.

Corn was moderately active and firmer early, and later became quiet and easier. This market opened 1/4c higher than the closing prices as yesterday.
Outs were more active but steads, with about

senting the receipts. Very few low grade, poor cattle are coming in from the country this season as compared with former years. Mild, spring-like weather and plenty of good feeding is so far favorable to quality of stock showing up at markets. Heavy weight cattle are off 250 per 160 from last week's prices, and light grades 106015c.

All the dealers unite in reporting a very slow market. Some 20 to 25 loads are unsold, and from present outlook must be sold at a sacrifice. Among receipts this week were 8 carloads of bulls, when the semants of the market do not call for more than 2 loads. For a few weeks past the supply in this line has not been up to demand. This fact having been circuited for more than 2 loads. For a few weeks past the supply in this line has not been up to demand. This fact having been circuited far and an unsettled feeling prevailed. Early a few sless were made at 25,605c advance, but with a goodly number unsold at last accounts. Said a leading live stock dealer: "I have not known for many years such as sudden drop in prices of bulls as it his week. Somehow we are apt to be weeks past the supply of bulls was away below demand. Now we can hardly give them away."

Sheep and Lambs.

Monian's supply of sheep and lambs was about double that of the two previous Mondays, footing up between 25 and 30 loads. There are still unsold three of four loads, Markets ruled steady, by reason of favorable news from New York, Monday and Tuesday, but to-day gave signs of weakening. On Monday prices were a shade better than Good sleep were were a shade better than Good sleep were sold to-day at 8:40 which would have brought 8:40 years and the shade week. Holders became so firm in their ideas of value that orders were sent out to Chicago by a number of dealers. The Festive Bears Knock All the Life Out of the Petroleum Market.

SOMETHING NEW IN LOCAL FINANCES "Do you know that one of the greates drawbacks to portions of the East End for residence purposes is bad drainage, or rather no drainage at all?" said a Homewood Crossus yesterday. THE DISPATCH representative intimated that he had heard some-

thing of the kind, but asked for particulars. Crossus continued: "I refer particularly to Homewood, Brushton, Park Place and Wilkinsburg. At all of these places the most of the land is low and flat. After every rain or snow the ground is covered with from one to three inches of water, and it remains there until it soaks into the earth or is removed by exhalation There is no chance for it to run yesterday, was firm and advanced 11/4c, but later eased off 1/4@1/4c and closed about the same as yesterday.

off. To make the situation worse, the neighboring hills act as a conduit for the watershed, of which they form the barrier, and pour floods of water over the valley after every rain or thaw.

The consequence is that citizens of those lo-calities are compelled to wade through mud for about nine months in the year. Gum boots are in greater demand than shoeblacks."

Further on he adverted to this aqueous infliction upon the general health in the localities indicated, and remarked;

"A large number of the citizens use well water. It is generally—almost generally—bad. Owing to the flattish topography of the ground surface water cannot be excluded. It gets into the wells despite avery effort to keep it out.

the wells despite every effort to keep it out.
This renders it impure and unwholesome. In
many cases the water is boiled before using,
but this is troublesome and is often neglected.
The serious effects of drinking water impregnated with surface impurities is known to everybody who has paid any attention to the matter. It is a fruitful source of typhoid and kindred ailments. All of the places mentioned suffer more or less from those diseases every year. Ten years ago Wilkinsburg was almost decimated by typhoid, originating from impure water. All this comes from lack of drainage, which, in addition to poisoning the water, renders a considerable area of otherwise good land practically worthless."

The above statements were corroborated by other authorities; but it is only just to add that the disizens are fully alive to the inconven-iences and dangers pointed out by Mr. Crossus and are doing all they can as individuals to remedy the evils. But until a general system of drainage is entered upon no material im-provement can be expected. This would advance the value of property at Benwood and Brushton from 25 to 50 per cent and scarcely less in the low-lying districts of Wilkinsburg

"sales" in the afternoon was the significant word "goose egg." It told the whole story. There had been no business. RATHER UNUSUAL.

A Peculiar Condition of Business as Illustrated at the Banks. "The money market presents at least one cu-rious feature," said a Fourth avenue financier yesterday evening. 'In former Presidental contests there was a falling off in business before the election. Capitalists were governed by their doubts, and were slow to invest until they saw how the cat jumped—in other words, until they knew the result. This season sees a reversion of the custom. Banks were busy as they could be all through September and Octo-ber, and not until a few days before the ballots were cast was there any perceptible diminution in the volume of transactions. Everybody who had money interests at stake seemed confident had money interests at stake seemed confident that protection would triumph, and kept right along as if there was nothing unusual going on. Since the election, however, business has been comparatively slack. At least, we have not been crowded."

been crowded."

"How do you explain this change of base?"

"I hardly know, except upon the theory that all things come out about even in the end. It may be further accounted for by the law of supply and demand. This time a large amount of business was transacted before the election that is usually put off until after it takes place. It is, I presume, nothing more than the natural reaction from flush to easy times. Don't understand me as complaining. Times are good—better than at the same time last year—but scarcely up to what we expected. However, there will be an improvement before long. Everything points to a prosperous year." there will be an improvement before long. Everything points to a prosperous year."

Money Gets Into One of Its Periodical Ruts—An Explanation.

"Money is in a net to-day," said Mr. William Roseburg, of the Bank of Pittsburg, yesterday afternoon. "It gets that way occasionally, afternoon. The middle of the week when there are few accounts to liquidate. To-morrow and for the rest of the week it will be all vight. The checks are only temporary. So far our business since January I has been larger than during the same period last year."

St, Paul was the feature on a report of a heavy increase of the earnings. The Coalers were the weak spot, Lackawanna leading. The liquidation of long accounts was resumed, and pressure of short sales was added. Among the specialties Chicago Gas Trust was especially weak, sympathizing closely with Cotton Oil, which made a further drop on a very large business. The market closed quiet but weak at about the lowest figures. Chicago Gas Trusts declined 234. Lackawanna 134. Missouri Pacific and Michigan Central each 134.

The railread bond market was less active. Erie seconds furnished \$75,000 to the day's total business, followed by the Reading fours, with \$242,000, the firsts \$136,000 and the seconds with \$122,000. The tone was strong, but the movement was not so marked as usual of late, and important changes are few. Big Four fours rose 2 to 96: Erie seconds 134, to 99, and Erie funded fives 234, to 9134.

—At a meeting of the directors of the Union Pacific Railway, held in Boston Saturday, Edwin F. Atkins was elected a director in place of Elisha Atkins, deceased; P. Spaulding in place of M. D. Spaulding and J. H. Millard, of Omaha, in place of Ezra H. Baker. President Adams made an address in which he spoke in high terms of the deceased directors.

The United States Court at Philadelphia is considering a suit against James Lee & Son for importing contract labor from England. Counsel for Lee & Son claim that the men over the engagement of whom the dispute is waged were employed to perform work in introducing a class of goods that had never been manufactured in this country before, and that such employment came within the exception intended by the law.

—Late advices from Costa Rica regarding the earthquake of December 30 last, briefly mentioned in the cable dispatches a short time ago, say the shocks were the most severe experienced since 1882. In San Jose both the national capitol and the magnificent Cathedral-fronting the public square, which required ten years of labor to erect, at an expenditure of \$1,000,000, are in ruins. The Presidental palace, city hall, national postoffice and a dozen other public buildings are almost wrecked.

New York, January 16.—The stock market was again moderately active to-day, but it shows the effects of the recent liquidations. The general bullish feeling, especially on the foreigners, kept the market firm during the afternoon, but later the pressure of stocks for sale for both accounts knocked the entire list off materially. London was a liberal buyer at the opening, and considerable demand for stocks existed, especially in the Grangers and trunk lines.

—For two weeks past the demi-monde of St. Louis have been persecuted by a letter writer, who signs himself "The Seer." the has been threatening them with physical and moral destruction of the most tery character, and the would call around and do a little "Jack the Ripper" business. The Chief of Police has 50 of these letters in his possession, and yesterday, after a long hunt, ran down "The Seer." who proved to be a religious crank. His name is William Brennan. A woman was arrested with him.
